Product Declaration

Materials of Animal Origin, Bovine Spongiform Encephalopathy (BSE) and Transmissible Spongiform Encephalopathy (TSE)

Product Lines:

- Ultraform® Acetal (POM)
- Ultrason® High Temp Polymer
- Ultradur® PBT Thermoplastic Polyester
- ecoflex® Biopolymer
- Neopor® EPS
- Capron® Nylon
- Ultramid® Nylon
- Nypei® Recycled Nylon
- Petra® PET Thermoplastic Polyester
- ecovio® Biopolymer
- Styropor® Expandable Polystyrene

Dear Valued Customer:

We confirm that the substances used in the manufacture of the referenced products above are mainly of petrochemical origin and not from cattle, sheep or goat.

If additives of animal origin are used, they are treated at high temperatures and undergo chemical reactions, which exceed by far the stringent requirements laid down in the note for guidance EMEA/410/01 Rev. 02 (October 2009) adopted by the CPMP (Committee for Proprietary Medicinal Products) and CVMP (Committee for Veterinary Medicinal Products). In addition the treatment exceeds the requirements of the directive 2000/6/EG Annex II. These specified conditions are considered to be sufficient to inactivate TSE transmitter. Accordingly, transmission of animal spongiform encephalopathy agents via the mentioned plastics is extremely improbable.

Please note that the following Kosher products do not contain any ingredients of animal origin:

- Ultramid B27 12
- Ultramid B27E 01
- Ultramid B32 01
- Ultramid B33 01
- Ultramid B36 01
- Ultramid B40 01

As the supplier of the raw material, we cannot make any statement with regard to the extruded or molded components made from this material since this may be process dependent.
Regards,

William Robert, CIH
