## Product Declaration

RoHS Directive 2002/95/EC, Directive 2003/11/EC, ELV Directive 2000/53/EC, WEEE Directive 2002/96/EC

The European WEEE directive is targeted at the prevention of waste EEE and the reuse, recycling and other forms of recovery of such wastes, and in such, does not restrict the use of any specific chemicals and is targeted at producers and distributors of EEE, not material suppliers. Annex II refers to the removal of certain substances and components from the collection stream, rather than their restriction from use. Therefore BASF Corporation can not make any claims with regard to compliance with this directive.
